

Thank you for using the Do-It-Yourself Fence Zone. Please complete the three easy steps below and email us your information to [layout@afence.com](mailto:layout@afence.com). If you have any troubles please call one of our locations to help you.

## 1) What type of fence are you looking for?

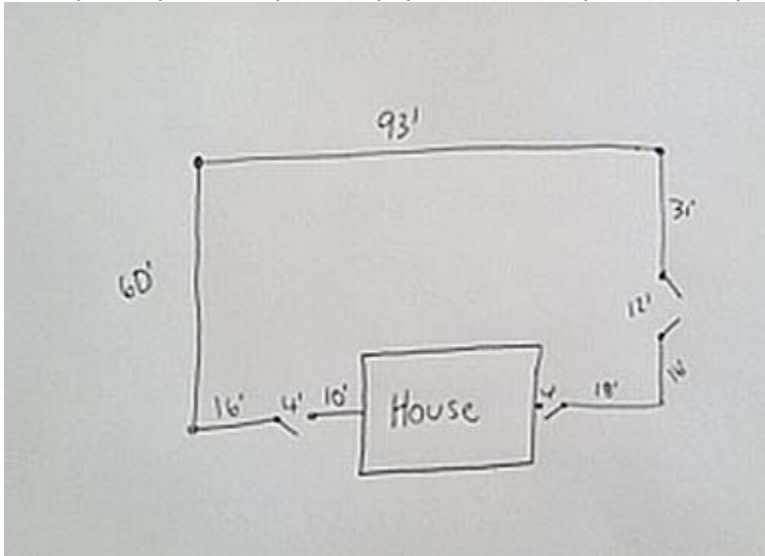

Describe the fence you are looking to purchase the best you can and let us know what you are using your fence for so we can get a feel for what is going to best suit you.

## 2) Give us your layout.

Figure out where you want your fence to go and make a drawing of your layout with all your measurements. This requires you to measure each side of your layout. The only way to do this right is to go outside to where you want your fence and measure it with a measuring tape of some sort. Do not step it off to take a measurement, do not use a survey and do not guess your measurements. There are three easy ways of sending us your measurements.

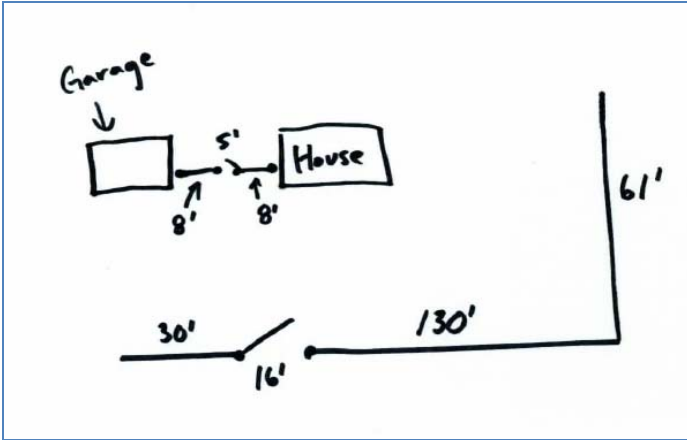

### OPTION 1

Draw your layout on a piece of paper and take a picture with your smart phone.

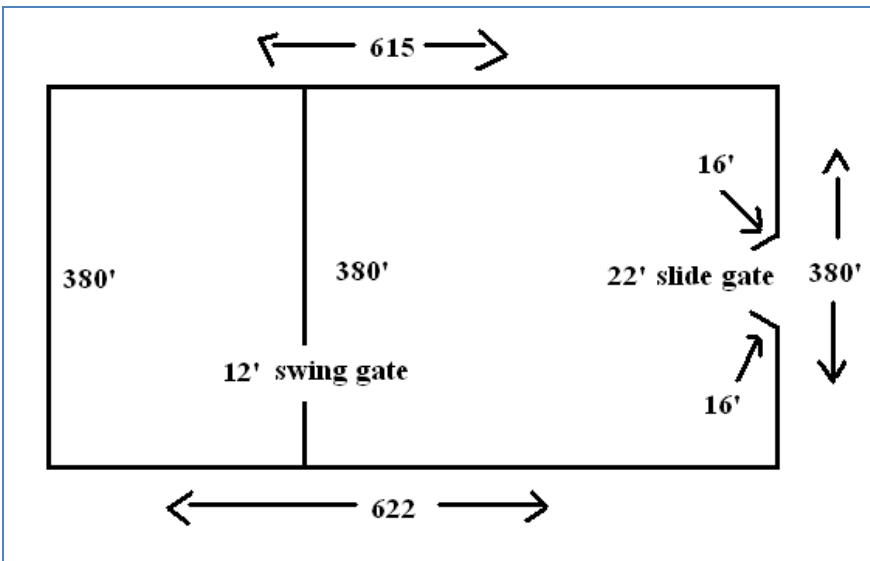

**OPTION 2**

Draw your layout on a piece of paper and scan it into your computer.

**Option 3**

Draw it from a program on your computer. Example Microsoft Paint.

**3) Give us the delivery zip code of the project and your contact information!!!!**

**We look forward to hearing from you**

Subject:		Fence Estimate

Hello,

I would like to get an estimate please.

- 1) I need a 4' tall galvanized chainlink fence. We have a small dog and want to keep her in the back yard.
- 2) Here is a layout: It has 2 walk gates and one double gate.

- 3) Please include shipping to zip: 45678

Thank you,  
Amy Smith
